All vehicles listed alphabetically in the index. If we do not specify "Truck" then the listing applies to passenger cars only.

STEP 1: Under correct make look up the year numerically.

STEP 2: Under the year find the correct application such as 6 cyl, 8 cyl, std trans, etc.

STEP 3: Across from correct application find the Interchange number. Look this number up numerically in the "Interchange Section" which directly follows the "Index".

CARRIER ASSEMBLY

Includes the inner 3rd member parts

INDEX

IMPORTANT NOTE FOR Interchange #1 (31 splines). Ford Mercury, Lincoln, T-Bird with 9 3/8" RG diameter does not fit carriers with smaller ring gear diameter. This is because there is not enough clearance in the housings to accept the larger 9 3/8" ring gear. Carriers with smaller ring gear diameters can be used in place of 9 3/8" ring gear.

Ratios and locking and non-locking axles not considered in interchange.

Switch rear flange yokes and retainers when necessary. See interchange section "Rear Flange Yokes" for possibility of need to switch yokes.

Coverage is of removable carrier type axles only For non-removable carrier (Integral) type axles see section "Integral Axle Assembly".

10 bolt
$10\frac{3}{4}$ x $11\frac{3}{4}$ " dia outside

IMPORTANT NOTE: When switching carriers between large (3-5/32" O.D.) whl brgs, usually found on 8-390, 406, 427, 428 engines, and small (2-13/16" O.D.) wheel brgs, exc above engines, you must include the axle shafts or if different lengths (see axle shaft section) purchase proper axle shafts. This is especially common on Ford & Mercury thru 1968. We strongly recomment interchanging

carriers with the same dia. wheel bearing

NOTE: 28 spline shaft.
$8\frac{3}{4}$ & 9" R.G. commonly called 9" R.G., 28 tooth Rr flange yoke. 5 types of yokes used. Switch yokes & retainers when necessary.

NOTE: Std carrier has 2-57/64" O.D. brg cup stpd LM501310. Heavy duty has 3-1/16" O.D. brg cups, stpd LM603011
NOTE: Tap another oil filler hole when necessary.

RADIATOR

INDEX

NOTE: Compare Radiators. We usually do not differentiate between radiators w/ and w/o oil coolers. Radiators w/oil coolers fit those w/o oil coolers but not the other way around. In some instances we do not differentiate radiators of different thickness. It is not advisable to replace a heavy duty (thicker core radiator) with a lighter duty one, (slimmer core, smaller engine).

When we do list further interchange stating such & such number bolts up, usually the difference is core thickness. And, usually they will interchange but compare. Check the oil cooler and hose connections.

Dimensions are core, not overall measurements, listing height, width & thickness of core in that order.

Number in index in ( ) are core thickness.

FAN CLUTCH ASSEMBLY INDEX

NOTE: YB Number is Motorcraft number.

Note: Not all makes with specific engines listed use a fan clutch assy. A listing such as Ford '63 8-260 means only '63 8-260's that use a fan clutch. In this case it is only those with a deluxe hang on air cond.

Usually fan clutches with shorter depth fit in place of deeper depth clutches (which use a longer shaft) if bolt pattern is the same.

ENGINE ASSEMBLY
INDEX

IMPORTANT NOTE: The interchanges listed are very general. Our research says they will interchange, but you will have to switch (or purchase) when necessary front engine mounts, exhaust manifolds, oil pan with oil pump, screen & dip sticks (especially between car & truck). Linkage must be adapted. And from auto to std trans, add pilot bushing bearing to crankshaft. When you have completed an engine interchange please let us know what exactly had to be done.

CAMSHAFT

INTERCHANGE

Important Notes: 1) Do not interchange hydraulic lifters & camshaft in a mechanical block set up because there is not a oil passage. 2) When changing camshafts & lifters make sure the same lifters run on the same lobes. 3) You can interchange a harder shaft where a soft (cast) shaft was used but not visa versa.

Note: Under interchange numbers the identification letters underlined are actually either backwards or upside down.
Example: #9 AE is ∀E
#14 BR is ꟻR
See ident section end of interchange section.
