GENERAL INSTRUCTIONS

This Ford Car Master Parts Catalog contains replacement parts and accessories information for Ford, Fairlane/Torino, Mustang, Thunderbird, Bronco, Falcon, Maverick and Pinto for model years 1965 through 1972 for U.S. and Canadian built vehicles. Unique Canadian part numbers and applications have been identified by a symbol (♦) and footnoted. Unique U.S. part numbers and applications have been identified by a symbol (☆) and footnoted. Use this "text" catalog in conjunction with the "illustration" catalog, Form FP-7635-B.

Refer to the Index on page 1 for a listing of the various items appearing in the General Information Section.

HOW TO USE THIS CATALOG

There are three ways of finding part numbers.

1. By Part Name.
2. By Illustration
3. By Identification.

Should an inquiry be received for a rear carrier plate for a 1971 Thunderbird:

BY PART NAME -

A. Refer to the Chassis Parts Alphabetical Index.

B. Refer to the alphabetical nomenclature and find the part name "Plate (rear carrier)". The group number listed is 2211-2.

C. Refer to group number 2211-2 and locate vehicle catalog code "S" (for Thunderbird). Find 1971 (71) in the "YEAR" column.

D. The part numbers shown are C7AZ 2211-E for right hand and C7AZ 2212-E for left hand.

BY ILLUSTRATION -

A. Refer to the Illustration Catalog (Form FP- 7635-B) to the divider marked "WHEELS, BRAKES".

B. Refer to the index immediately behind the divider and find the illustration titles for 1971 S (Thunderbird).

C. Under the heading "BRAKES" find the "Brake details (drum rear)" illustration for the 1971 Thunderbird.

D. Refer to the illustration designated (on page 4 of Illustration Section 20.1) and find the group number for the rear carrier plate to be 2211-2.

E. Refer to group number 2211-2 in this Text catalog and locate vehicle catalog code "S" (for Thunderbird). Find 1971 (71) in the "YEAR" column.

F. The part numbers shown are C7AZ 2211-E for right hand and C7AZ 2212-E for left hand.

BY IDENTIFICATION -

Certain parts and most major assemblies are identified with a part number shown on an attached tag or plate or on the part itself. Reference to identification numbers is made throughout the catalog and cross reference charts are included in some sections to provide immediate knowledge of the service part number when the identification number is known.

IMPORTANT - Identification tags and plates must be retained with the part or assembly with which they are originally supplied.

R. H. and L. H. PARTS

The driver's side is the left hand side of the vehicle and determines whether such parts as fenders, lamps, etc. are right or left hand.

Most Right Hand and Left Hand parts are listed in the manner shown in the following examples. The model application pertaining to the Right Hand part also pertains to the Left Hand part.

EXAMPLE 1 - Right Hand and Left Hand on separate lines

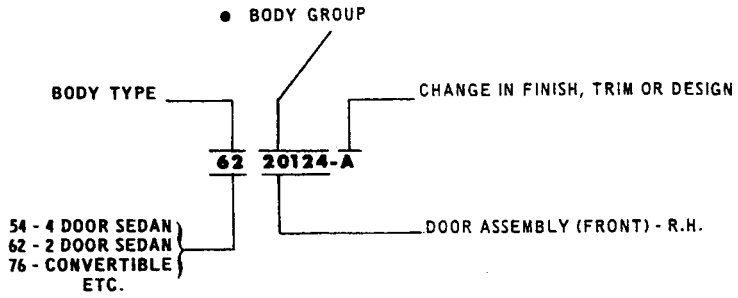
EXPLANATION OF THE FORD PART NUMBERING SYSTEM

For greater convenience this catalog is divided into specific sections; such as brakes, front suspension, engine, transmission, etc. For example, FRONT SUSPENSION appears in Section 30, STEERING in Section 35, REAR AXLE in Section 40, etc. The applicable exploded illustrations are contained in separate sections which are related to the Text Section numbers. For example STEERING Illustrations appear in Illustration Section 35 of the "Illustrations" Catalog, Form FP-7635-B.

The basic part number groups and the section numbers under which each is listed are shown on page 7 of the General Information Section.

The basic part number groups shown on page 7 have been expanded as shown in the Charts on pages 8, 9 and 10 to provide for additional groups to accomodate new lines. In numerical listings, expanded numbers will be considered to follow the same sequence as the regular basic numbers from which they are expanded and are arranged in Catalogs as follows.



3538
3C538
3634
3A634

Illustrations contain basic or group numbers only, therefore, it is necessary to refer to the basic or group within this "text" catalog for complete applicable part numbers.

IMPORTANT: AS EACH INDIVIDUAL EXPANSION SERIES BECOMES EXHAUSTED of NUMBERS, ANOTHER SERIES WILL BE ESTABLISHED BY USE of THE NEXT ALPHABETICAL EXPANSION LETTER SUCH AS "B" thru "Z".

MOTORCRAFT SALES PART NUMBERS

To facilitate the stocking and handling of those service parts which are assigned both service part numbers and Motorcraft Sales Part Numbers, the Motorcraft Sales Part Numbers are shown in parenthesis immediately following or below the service part numbers.

For example, refer to Section 96, Group 9601. The service part number for a carburetor air cleaner element used on a 1969 Mustang with a 6 cylinder 250 C.I.D. engine is C9ZZ 9601-A and the Motorcraft Sales Part Number is FA-68. In the catalog this item will be shown as C9ZZ 9601-A(FA-68).

SYMBOL USED REGULARLY IN CATALOG

★ Symbol indicates part is not supplied for service due to the following:

a. Part is superseded and replaced as indicated in the description column of text.

b. Part can be improvised as indicated in the description column of text.

c. Due to its function there would be little or no demand.

NOTE: ALWAYS REFER TO THE DESCRIPTION COLUMN OF THE TEXT FOR POSSIBLE SUBSTITUTION, OR FOR MATERIAL SPECIFICATIONS AND DIMENSIONS WHICH MAY BE HELPFUL IN OBTAINING THE NON-SERVICED PART LOCALLY.

FORMATS

Various formats are used throughout this catalog to coincide with the normal procedure for selecting the affected part numbers. Most areas of the catalog use a format arranged in the order shown below:

Column -

1 Model year
2 Type of vehicle or equipment within a specific model year
3 Description, size, etc.
4 Quantity required per vehicle
5 Complete part number

Formats peculiar to a particular area of the catalog are generally self explanatory. When necessary, instructions are shown at the beginning of the affected group. For instance, the various charts and parts list method of cataloging in the Carburetor Section are explained on Page 1 of Section 95.

MODEL YEAR APPLICATION

Model year application is indicated by showing the first year followed by a diagonal line to indicate continued usage in all subsequent years until the insertion of the last year of usage, which will then be inserted after the diagonal line. If no diagonal line is shown, the part is applicable only to the year indicated.

Example:

65/	Indicates part used 1965 through 1972 as shown in this catalog, for possible application beyond 1972 see 1973/ Ford Parts Catalog, Form FP 8094-A.
66/68	Indicates part used 1966 through 1968 model years.
67	Indicates part used 1967 model year only.
72	Indicates part used 1972 model year, for possible usage beyond 1973/ see Ford Car Parts Catalog, Form FP 8094-A.

BODY TYPE CODES

Most body parts and some chassis parts are identified by Body Type Codes. A complete listing of body type codes is shown on pages 31 thru 34 of this General Information Section. Similar body types are identified by the same code number; the body type suffix is used to identify a particular body type. For instance, in 1968 (Ford) body type code 54 was used as follows:

1968	A(54A)	Galaxie "500" 4 Door Sedan
	A(54B)	Custom "500" 4 Door Sedan
	A(54C)	"LTD" 4 Door Sedan
	A(54E)	Custom 4 Door Sedan
	A(54)	4 Door Sedans

Body type codes (less suffix) are shown in the model column of the catalog text or with illustration titles when all body types of a related group are affected. For example, when Body Type Code 54 is shown, it includes 54A, 54B, 54C and 54E.

SOFT TRIM

Soft Trim parts are arranged in separate sections by model year i.e. 1965, 1966 etc. Each includes facsimile trim swatches and complete trim codes. To determine the complete part number of a trim part, it is necessary to know the "Trim Code" which is shown on the Warranty Plate or Certification Label of the vehicle (refer to Pages 18 thru 22). Instructions for selecting soft trim parts are contained at the beginning of each Soft Trim Section.

ATTACHING PARTS (NUTS, BOLTS ETC.) and LOCATOR CODES

Standard and utility hardware, such as bolts, screws, fittings, etc. are listed below the part with which they are used. To facilitate the stocking and handling of standard and utility parts by Ford Dealers, locator codes are preassigned by Ford Motor Company. The locator codes are shown in parentheses immediately following or below the standard and utility part numbers. For an example, refer to Body Section 030, Page 1, Group 03014. The part number for a 1/4-20 x 1/2" hex. head bolt is 20308-S8 and the locator code is (B40). In the catalog this item will be shown as 20308-S8 (B40).

LIQUID MEASURE

Most liquid measures listed in this catalog are in U.S. sizes and certain other liquid measures (unique to Canada) listed in this catalog are in Canadian sizes. The following chart provides an understanding and a translation of U.S. to Canadian and Canadian to U.S. sizes.

	1/2 pt.	Pint	Quart	Gallon
	(capacity in ounces)		(capacity in ounces)	
Canada	10	20	40	160
U.S.	8	16	32	128

Example: 5 U.S. Quarts (160 ounces) equal 4 Canadian Quarts (160 ounces) or 1 Canadian Gallon.

D.S.O., F.S.O. or L.P.O. (SPECIAL ORDERS)

The District Code Number will appear in the D.S.O. space on the Warranty Plate or Certification Label for all units including regular production. Always furnish appropriate Warranty Plate or Certification Label information and D.S.O. Number, if applicable, when ordering parts not listed in the catalog. If the unit is D.S.O., F.S.O. or L.P.O. (Special Order), the complete Order Number will appear in the D.S.O. space in addition to the District Code Number.

HOW TO ORDER PARTS

When ordering parts, always give the complete part number.

In the event the part number is not known, the following information should be included.

A. Complete description of part.

B. Model year and body type.

C. Dimension, number of teeth, size, etc.; if possible rough sketch of part.

D. If applicable to engine, transmission, axle, steering, etc.; specify type; such as 390 C.I.D., Fordomatic, Power Steering, etc.

E. Advise how shipment is to be made - Freight, Express, Air, Parcel Post.

(ALL EXCEPT BRONCO)

P-8190

Effective dates shown in the catalog, e.g. "Before 12/15/69" and "From 12/15/69" may be determined through interpretation of the build date shown on the owner card. This information corresponds to that shown on the warranty plate from 1965 to 1969.

The numerical position of the build date represents the day of the month.

The alphabetical portion of the build date represents the month in which the unit was built.

For example - 29D indicates

29th day of month

D - April

Refer to page 36 for a complete list of month codes and the corresponding month.

LIQUID MEASURE

Most liquid measures listed in this catalog are in U.S. sizes; however, those measures which are specified for unique Canadian parts are in Canadian sizes.

The capacity in ounces for both U.S. & Canadian measures are specified below.

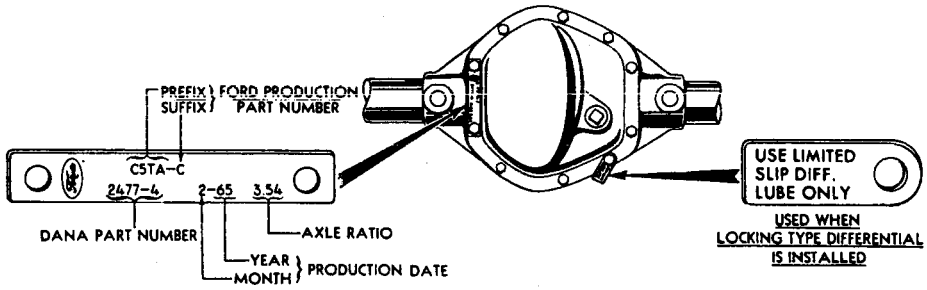
3002 AXLE ASSY. - FRONT DRIVING - LESS WHEELS



FRONT DRIVING AXLE IDENTIFICATION TAG

Each front driving axle is identified by a number which appears on a metal tag attached to the axle. In addition to this identification number the Dana part number, month and year of production and axle ratio also appear on this tag.

A second tag is attached to those axles which are equipped with locking type differentials.

Refer to the illustration below for the location of these identification tags. A guide listing these axle identification numbers in numerical and alphabetical sequence follows the illustration.

Axle assemblies, although not normally stocked as service items, may be obtained from the nearest assembly plant when used in current production. Order through your local Parts Distribution Center.

HOW TO FIND STEERING WHEELS, PADS, CAPS & COVERS

To find Steering Wheel and/or Caps you must know:

YEAR, MODEL and COLOR

1. Identify Year and Model by referring to Warranty Plate Codes as shown in the General Information Section.

2. Determine color by:
   (a) Visual identification
   or
   (b) Trim code (second character of trim code generally applicable to each color)

3. Refer to listing below and find the appropriate Year and Model.

4. Match Year and Model with appropriate color and/or trim code to select desired part number.

   For example, should an Ivy Gold steering wheel and/or wheel pad be required for a 1967 Ford LTD -

   1. Refer to 1967.
   2. Read list of colors to find Ivy Gold.
   3. Read down to find A (XL and LTD).
   4. Part number shown (for wheel) is C7AZ 3600 and suffix in "Ivy Gold" column is L and Cap part number is C7AZ 3623-AF.

PULLEY IDENTIFICATION CHART

An identification number appears on the front portion of the pulley assembly. The following chart will provide a quick cross reference to the service part number when the identification is known. Pulleys may also be selected by year, model and description in the model application chart which follows the identification chart.

HOW TO FIND REAR AXLE PARTS

1. Determine the basic number of the part
   a. Use the Illustration Index to find a detailed view of the rear axle on the unit being repaired and identify the part needed.
   b. Use the Alphabetical Index which follows the General Information Section of the catalog.
2. Determine the axle model tag number
   The picture below shows the location of axle model identification tags.
3. Find the axle model tag number in the Identification Chart which starts on the next page and note the information given there about ratio, ring gear, type, wheel bearings, differential bearings and shaft splines.
4. Turn to the Group Number of the part needed and select the correct part, using the information on ring gear size, type, etc.

FORD DESIGN REAR AXLE MODEL IDENTIFICATION TAG

Effective with the 1964 models, a service identification tag was attached to the Ford design rear axles as illustrated below. Inquiries pertaining to rear axles used on 1965 and subsequent models should include the axle model identification number.

REAR AXLE IDENTIFICATION CHART

The following chart lists models of Ford design rear axles built since 1965 in alphabetical order. Axle model suffixes with numerical codes are shown where interchangeability is affected. This chart will assist in determining the application for rear axle components which are cataloged throughout Sections 40 & 46 by size, description, ratio, type of differential or reference to size of ring gear, wheel bearings & differential bearings. Abbreviations used in the 'type', 'whl.brg." and 'diff.brg. & cup" columns have the following meanings:

TYPE

C . . . . . Conventional - 2 pinion - non-locking
C4 . . . . . Conventional - 4 pinion - non-locking
E . . . . . Equalock - 2 pinion - limited slip
E4 . . . . . Equalock - 4 pinion - limited slip
T . . . . . Traction Lok - 2 pinion - locking
T4 . . . . . Traction Lok - 4 pinion - locking

• Production inadvertently installed axle tags with 9 3/8" ring gear model identification on some vehicles that have 9" ring gears. Vehicles with 9" ring gears can be identified by the differential carrier which has four horizontal and one vertical reinforcement rib and a 4 1/2" I.D. pinion hole. If a service differential carrier is installed it can be identified by five horizontal and two vertical reinforcement ribs and an "N" embossed between the two vertical ribs.

4602 DRIVE SHAFT ASSY.

Drive Shafts Group 4602, Universal Joints Group 4635 and Knuckle & Plug Assemblies Group 4841 are cataloged in chart form under group numbers 4602. The drive shafts and related parts are listed by model years and within the model years designated by car line. The various codes designating the universal joints and knuckle & plug assemblies are explained below. Identification charts showing the various dimensions of universal joints and knuckle & plug assemblies appear under Groups 4635 and 4841.

Universal Joint Codes used throughout the chart apply to Part Numbers as indicated

HOW TO FIND EXHAUST SYSTEM PARTS

1. USE CAR MODEL APPLICATION

Refer to the Year - Model index as follows:

YEAR	MODELS	SECTION	PAGE
1965	All	52.65	1
1966	All	52.66	1
1967	All	52.67	1
1968	All	52.68	1
1969	All	52.69	1
1970	All	52.70	1
1971	All	52.71	1
1972	All	52.72	1

These symbols are used in the parts tables:

□ is used for major components. They are numbered in order from engine to end of exhaust system.

o is used for clamps. They are marked A, B, C from front to rear.

Δ is used for brackets or hangers. They are numbered from front to rear.

2. USE STAMPED NUMBERS

Refer to Cross-Reference charts in Section 52, as follows:

NAME	BASIC NUMBER	SECTION	PAGE
Intermediate pipe	5A212, 5A289	52	2
Muffler	5230	52	3
Inlet pipe	5246	52	18
Outlet pipe	5255	52	21

3. USE SIZES

Refer to Size charts in Section 52, as follows:

NAME	BASIC NUMBER	SECTION	PAGE
Intermediate pipe	5A212, 5A289	52	2
Muffler	5230	52	6
Inlet pipe	5246	52	19
Outlet pipe	5255	52	23

4. USE SIMPLIFICATION REPLACEMENT CHARTS

(Summary charts of replacements made under Exhaust Simplification Programs).

PAGE
1965/66 12
1967/71 13

5. USE HANGER REPAIR KITS

Many original-equipment hangers may be repaired by universal-type replacement kits. Refer to page 25 to determine which kit to use.

1967/71 EXHAUST SYSTEM SIMPLIFICATION REPLACEMENT CHART

Exhaust systems for 1967/71 cars have been simplified. For those applications where mating parts are affected, the affected parts are shown in the "MUST BE USED WITH" column. For example: Muffler C7AZ 5230-A is replaced by simplified muffler C7AZ 5230-AH. Since the new muffler is shorter than the original, a longer outlet pipe (D0AZ 5255-T) MUST BE USED.

For model application, refer to Section 52, page 1.

Explanation of picture - text catalog sheets -

In sections 52.65 through 52.72, the complete present service system is shown at the top of the page, with an illustration and a complete bill of materials. If a second illustration appears below, that is the service system before simplification. In the lower system (before simplification), parts which are changed are shown by dotted lines, and the part numbers are shown in the table. Parts shown in black are parts which are unchanged and shown above in the upper illustration.

For stamped number cross-reference information and for size information, refer to Section 52, page 1.

EXHAUST PARTS MODEL INDEX

How to use this index -

1. Find the car model desired.
2. Find the line which lists the engine displacement needed.
3. Select the correct page, and turn to that page.

Explanation of picture - text catalog sheets -

In sections 52.65 through 52.72, the complete present service system is shown at the top of the page, with an illustration and a complete bill of materials. If a second illustration appears below, that is the service system before simplification. In the lower system (before simplification), parts which are changed are shown by dotted lines, and the part numbers are shown in the table. Parts shown in black are parts which are unchanged and shown above in the upper illustration.

For stamped number cross-reference information and for size information, refer to Section 52, page 1.

EXHAUST PARTS MODEL INDEX

How to use this index -

1. Find the car model desired.
2. Find the line which lists the engine displacement needed.
3. Select the correct page, and turn to that page.

Explanation of picture - text catalog sheets -

In sections 52.65 through 52.72, the complete present service system is shown at the top of the page, with an illustration and a complete bill of materials. If a second illustration appears below, that is the service system before simplification. In the lower system (before simplification), parts which are changed are shown by dotted lines, and the part numbers are shown in the table. Parts shown in black are parts which are unchanged and shown above in the upper illustration.

For stamped number cross-reference information and for size information, refer to Section 52, page 1.

EXHAUST PARTS MODEL INDEX

How to use this index -

1. Find the car model desired.
2. Find the line which lists the engine displacement needed.
3. Select the correct page, and turn to that page.

Explanation of picture - text catalog sheets -

In sections 52.65 through 52.72, the complete present service system is shown at the top of the page, with an illustration and a complete bill of materials. If a second illustration appears below, that is the service system before simplification. In the lower system (before simplification), parts which are changed are shown by dotted lines, and the part numbers are shown in the table. Parts shown in black are parts which are unchanged and shown above in the upper illustration.

For stamped number cross-reference information and for size information, refer to Section 52, page 1.

EXHAUST PARTS MODEL INDEX

How to use this index -

1. Find the car model desired.
2. Find the line which lists the engine displacement needed.
3. Select the correct page, and turn to that page.

Explanation of picture - text catalog sheets -

In sections 52.65 through 52.72, the complete present service system is shown at the top of the page, with an illustration and a complete bill of materials. If a second illustration appears below, that is the service system before simplification. In the lower system (before simplification), parts which are changed are shown by dotted lines, and the part numbers are shown in the table. Parts shown in black are parts which are unchanged and shown above in the upper illustration.

For stamped number cross-reference information and for size information, refer to Section 52, page 1.

EXHAUST PARTS MODEL INDEX

How to use this index -

1. Find the car model desired.
2. Find the line which lists the engine displacement needed.
3. Select the correct page, and turn to that page.

Explanation of picture - text catalog sheets -

In sections 52.65 through 52.72, the complete present service system is shown at the top of the page, with an illustration and a complete bill of materials. If a second illustration appears below, that is the service system before simplification. In the lower system (before simplification), parts which are changed are shown by dotted lines, and the part numbers are shown in the table. Parts shown in black are parts which are unchanged and shown above in the upper illustration.

For stamped number cross-reference information and for size information, refer to Section 52, page 1.

EXHAUST PARTS MODEL INDEX

How to use this index -

1. Find the car model desired.
2. Find the line which lists the engine displacement needed.
3. Select the correct page, and turn to that page.

Explanation of picture - text catalog sheets -

In sections 52.65 through 52.72, the complete present service system is shown at the top of the page, with an illustration and a complete bill of materials. If a second illustration appears below, that is the service system before simplification. In the lower system (before simplification), parts which are changed are shown by dotted lines, and the part numbers are shown in the table. Parts shown in black are parts which are unchanged and shown above in the upper illustration.

For stamped number cross-reference information and for size information, refer to Section 52, page 1.

Original equipment muffler and outlet pipe are a welded assembly. To service this assembly you must replace it with both parts (muffler and outlet pipe) used together.

Consolidated muffler and outlet pipe must be used together as a matched pair. They will not mate with original service components.
