ENGINE IDENTIFICATION TAG

IN ALL INQUIRIES ALWAYS FURNISH THE COMPLETE TAG IDENTIFICATION INFORMATION

All engines for 1965 and subsequent model years include an engine identification tag. This tag describes C.I.D., model year, year and month of production, and change level number. On 8 cylinder 260 and 289 engines the tag is located under the water temperature sender (Basic 10884). On the 8 cylinder 390 Thunderbird engine it is located under the left front intake manifold attaching bolt. On all other engines the tag is located under the ignition coil attaching bolt. All engine code numbers consist of a basic number, a suffix, and in some cases a prefix. Generally the basic number is adequate for engine identification, if additional information is needed the prefix or suffix is included.

The catalog uses the change level number in the same manner as date restriction information is presently used. The change level number is advanced only when a replacing part or assembly being introduced and the old part or assembly it replaces are not completely interchangeable. These Engine Code Numbers and their designations are listed in the Engine Identification Chart which follows on pages 2, 3 and 4

▲ "C"-Cleveland
▲ "E"-Windsor
▲ "W"-Windsor

*Except when indicated in the chart below prefixes and suffixes are for Ford Motor Company use only and do not affect engine identification.

HOW TO IDENTIFY MANUAL TRANSMISSIONS and RELATED PARTS

Eight types of manual transmissions and one transfer case have been used as optional equipment for 1965 and subsequent model years.

PARTS DIRECTLY RELATED TO THE OPERATION OF THE TRANSMISSION ASSEMBLY, SUCH AS CASE, GEARS, SHAFTS, EXTENSIONS, ETC., ARE LISTED IN PARTS LISTS SECTIONS FOR EACH BASIC TRANSMISSION TYPE AS INDICATED BELOW.

PARTS NOT DIRECTLY RELATED TO THE TRANSMISSION ASSEMBLY, SUCH AS GEAR SHIFT OR CLUTCH MECHANISM, ARE LISTED IN SECTIONS 71 THRU 75.

Description and Type	Catalog Identification	Parts List Section	Years
3 Speed-2.77	2.77	70.1	65/67

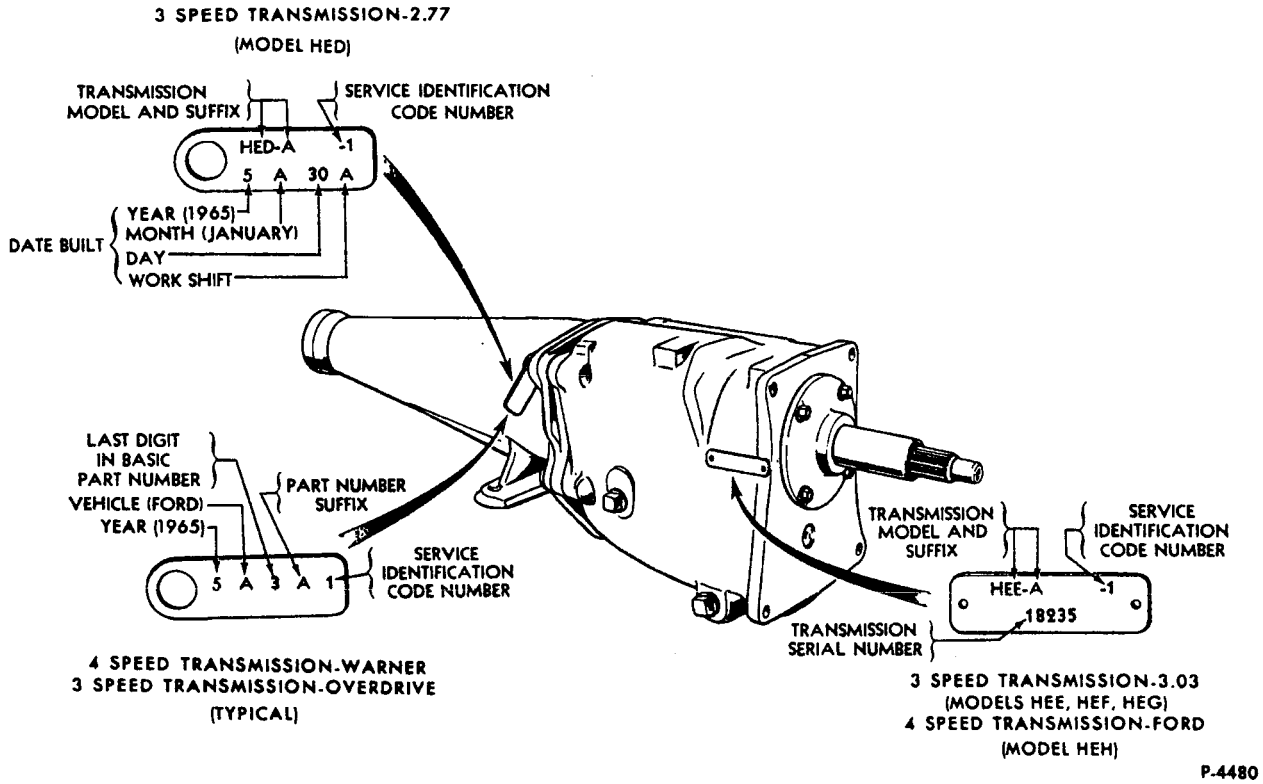
4 Speed-Ford	F/4/S	70.6	65/
4 Speed-Warner	W/4/S	70.7	65/66
Transfer Case & Details		70.8	66/

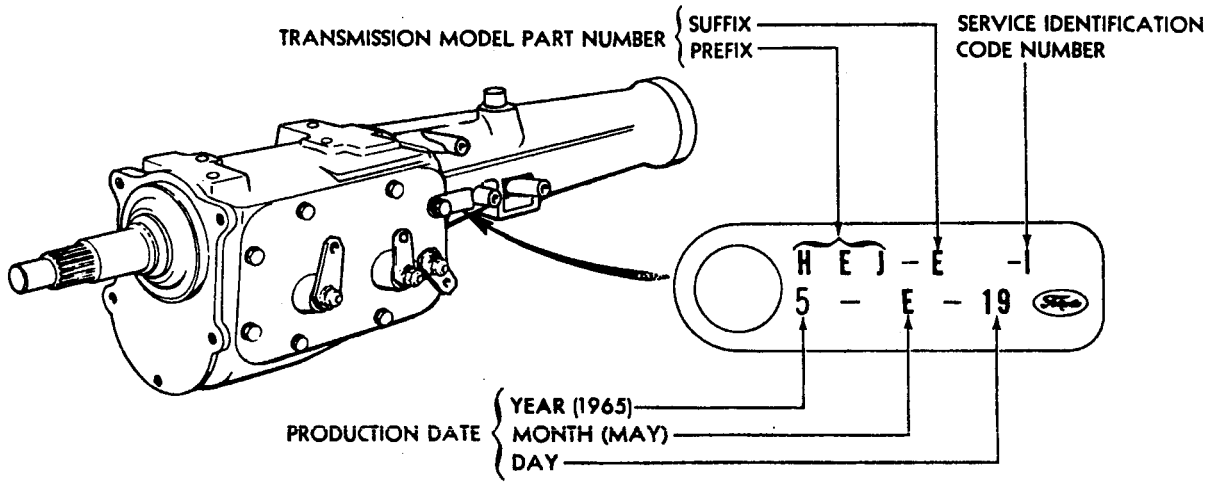
Each transmission is identified by a number stamped directly on the transmission case or appearing on a metal tag or plate attached to the case. Refer to page 2 of this section for the locations of the identification numbers.

Each basic transmission type and transfer case is identified by several numbers which reflect the different model years or the significant changes made within the same model years.



A guide listing the transmission identification numbers in numerical and alphabetical sequence appears on pages 3 and 4 of this section. When the transmission identification number is known, simply refer to this guide for the appropriate transmission type, year, parts list section and illustration section and page number.

Manual transmissions and their related parts can also be identified by year, model, engine, etc. on page 5 and up of this section.



Manual transmission illustrations are shown in Illustration Sections 70 thru 75 of the Illustrations Catalog, Form AF 7635-B.

HOW TO IDENTIFY AUTOMATIC TRANSMISSION PARTS

A. USE THE TRANSMISSION IDENTIFICATION TAG

1. Each transmission is identified by a number stamped directly on the transmission case or appearing on a metal tag or plate attached to the case.
2. Refer to Page 2 of this section for the illustrations showing the locations of the Service Identification numbers.
3. Each basic transmission type is identified by several numbers which reflect the different model years or the significant changes made within the same model years.
4. A guide listing the transmission identification numbers in numerical and alphabetical sequence by identification number appears on Pages 3, 4 & 5 of this section. When the transmission identification number is known, refer to this guide for the transmission type, year, parts list and illustration section.
5. Three basic types of automatic transmissions have been used as optional equipment for 1965 and subsequent model years.

DESCRIPTION and TYPE	CATALOG IDENTIFICATION	PARTS LISTS SECTION	YEARS
Cruise-O-Matic 3 speed			
Model (FX)-light duty	C/M (FX)	A70.3	1965/67
Model (FMX)-medium duty	C/M (FMX)	A70.3	1968/
Model (MX)-heavy duty	C/M (MX)	A70.3	1965/68
Automatic 3 speed dual range			
Model (XP)	C4	A70.4	1965/
Automatic 3 speed dual range			
Model (XPL)	C6	A70.5	1966/

6. How transmission tag information is listed in the catalog.
   a. If the same part is used on all PEB transmissions (PEB-A, PEB-B, PEB-C), the description area of the catalog will show "Used on #PEB".
   If a different part is used on PEB-A transmission than on PEB-B transmission, the description area of the catalog will restrict each part, i.e. "Used on #PEB-A, "Used on #PEB-B" etc.
   b. If the same part is used on PEB-D1 & PEB-D2 transmissions, the description area of the catalog will show "Used on #PEB-D".
   If a different part is used on PEB-D1 transmission than on PEB-D2 transmission, the description area will restrict each part, i.e. "Used on #PEB-D1, "Used on #PEB-D2".
   c. If a different part is used on a PEB-D transmission than on the PEB-D1 transmission, the description area of the catalog on the PEB-D part will warn the reader of the existence of the other part, i.e. "Used with #PEB-D (See also D0AZ 7153-A for #PEB-D1)".

B. USE THE APPLICATION CHART

Automatic transmissions and their related parts can also be identified by year, model, engine, etc., in the Transmission Application Chart beginning on Page 5 of this section.

C. USE AVAILABLE ILLUSTRATIONS

Automatic transmission illustrations are shown in several sections of the Illustration Catalog, Form AF 7635-B as indicated below.

	ILLUSTRATION SECTION
Transmission assemblies	A70.3 thru A70.5
Transmission oil cooling system and vacuum advance system	A71
Shift control mechanisms. Column mounted	A72
Floor or console mounted	A72.1
Steering column w/o shift mechanism	35
Transmission kickdown and accelerator linkage mechanisms	97
Console mounted parts related to shift control mechanisms	042

D. HOW TRANSMISSION PARTS ARE CATALOGED

1. Parts directly related to the operation of the transmission assembly, such as, case, extension housing, gear train, etc., are listed in parts lists sections A70.3, A70.4, & A70.5.
2. Parts not directly, but functionally related to the operation of the transmission assembly, such as, control selector mechanisms, oil cooling systems, etc., are listed in sections A71 thru A74.
